

Index to feature articles

Volume 166
January-December 1982

Subjects

Chemicals & chemistry

Alkaline papermaking: factors to consider to avoid potential conversion difficulties. Jeffrey G. Atkinson. February 15, p. 30.

All-polymer chemical system reduces mineral deposit in paper mill boilers. Fred White. August 30, p. 49.

Analyzing use of soy protein binders in coating formulation. C. L. Garey, September 15, p. 41.

Industry's chemical consumption drops as U.S. tries to pull out of economic slump. Mary Anne Murphy. August 30, p. 27.

New support for use of hydrogen peroxide for bleaching chemical pulps. Hannu Makkonen and Tauno Paakkonen. February 28, p. 31.

Silicone transformer fluid from Dow reduces PCB levels to EPA standards. Jacqueline Cox. September 30, p. 36.

Conference reports

Guidelines for reducing energy costs via insulation of a deinking system. Fred White. January 30, p. 54.

Microelectronics & grinder technology—engineered for high pm standards. Jacqueline Cox. May 15, p. 26.

Mill executive suggests a new approach computing environmental cost factors. Fred White. September 30, p. 42.

Mill management gets economic overview at API's annual 'Paper Week' sessions. *PTJ* Staff. April 30, p. 48.

Recycled fiber recovery & use—an industry prognosis for 1982. *PTJ* Staff. January 30, p. 47.

Spokesmen at NARI industry roundtable analyze world market for paper stock. Peter Wuerl. October 15, p. 19.

Studying effectiveness of insulators in eliminating dryer head heat losses. Fred White. January 30, p. 37.

Water quality models found to need adjustment to measure BOD loads. Fred White. October 15, p. 29.

Economics, statistics, & trends

Economic outlook favorable for start of major upswing during 1983. Jeremiah E. Flynn. December 15 & 30, p. 35.

Financial review: North America's 'Top 50' papermakers. Jeremiah E. Flynn. June 30, p. 39.

GNP is key growth determinant for N.A. printing/writing paper. *PTJ* Staff. January 15, p. 33.

Housing decline & economic downturn impact North American papermakers. Jeremiah E. Flynn. January 15, p. 28.

Paper Trade Journal celebrates its 110th anniversary with clippings from the past. *PTJ* Staff. May 30, p. 40.

Who's who in North American papermaking. *PTJ* Staff. June 30, p. 59.

Energy management

Analysis of the Scandinavian approach to steam turbine application/design. Lars G. Udd. May 15, p. 22.

Analyzing effective use of wood refuse for fuel in the pulp and paper industry. James E. Biles and Richard S. Sadowski. January 30, p. 43.

Boise mill cuts energy costs $1.4 million yearly via recausticizing/lime systems. Jacqueline Cox. March 15, p. 63.

Fluid bed waste wood gasifier promises fossil-fuel savings. Harry Dyer. Octo-

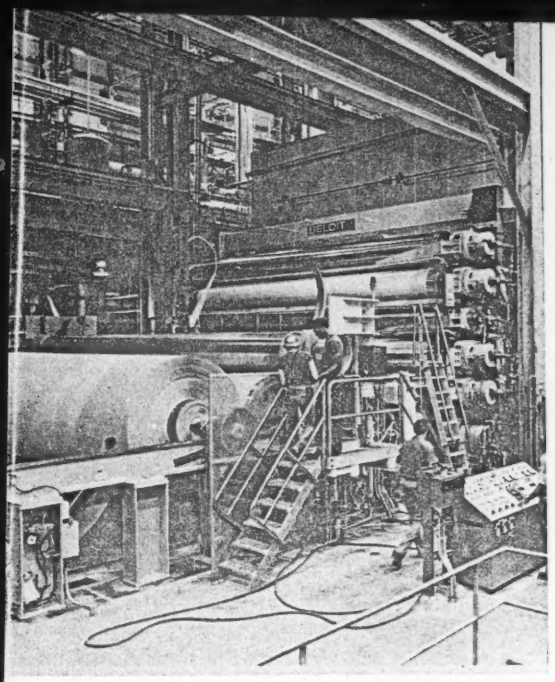
Energy management

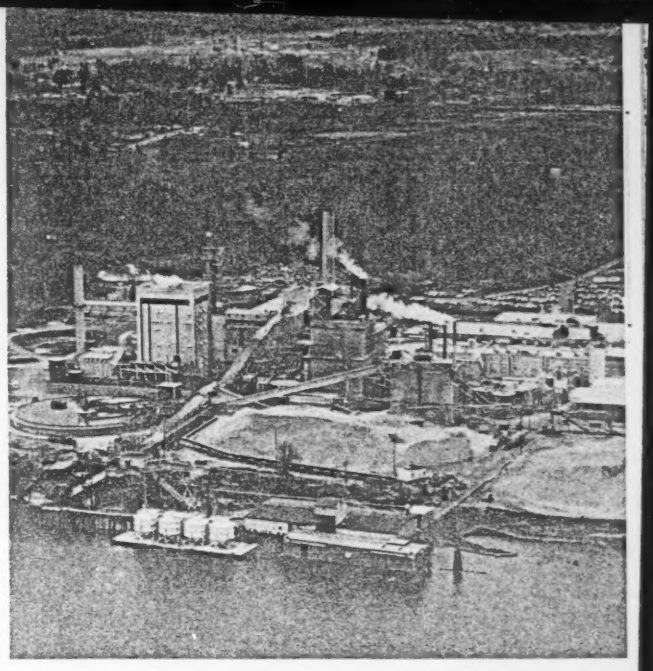
Analysis of the Scandinavian approach to steam turbine application/design. Lars G. Udd. May 15, p. 22.

Analyzing effective use of wood refuse for fuel in the pulp and paper industry. James E. Biles and Richard S. Sadowski. January 30, p. 43.

Boise mill cuts energy costs $1.4 million yearly via recausticizing/lime systems. Jacqueline Cox. March 15, p. 63.

Fluid bed waste wood gasifier promises fossil-fuel savings. Harry Dyer. Octo-





ber 15, p. 26.

Guidelines for reducing energy costs via insulation of a deinking system. Fred White. January 30, p. 54.

Oil/water emulsification system provides St. Regis mill with major energy savings. William Keenan Jr. February 15, p. 22.

Studying effectiveness of insulators in eliminating dryer head heat losses. Fred White. January 30, p. 37.

Environmental controls

Exploring the legal ramifications in handling of hazardous waste. Henry Beal. September 30, p. 40.

Mill executive suggests a new approach computing environmental cost factors. Fred White. September 30, p. 42.

(An) overview of solid-waste disposal practices of Wisconsin papermakers. Douglas J. Hermann. April 30, p. 42.

Silicone transformer fluid from Dow reduces PCB levels to EPA standards. Jacqueline Cox. September 30, p. 36.

Tracking efforts of Northwood Pulp to lower mill particulate discharges. J. E. Nylund. October 30, p. 45.

Water quality models found to need adjustment to measure BOD loads. Fred White. October 15, p. 29

Equipment & systems development

Analysis of the Scandinavian approach to steam turbine application/design. Lars G. Udd. May 15, p. 22

Analyzing the use of air showers to effect calender profile control. Jacqueline Cox. March 30, p. 30.

Characteristics of the Chemi-Washer at G-P's Bellingham and Crossett mills. Kenneth A. Coffey. August 15, p. 23.

Choosing the right turbine for efficiency now and optional applications later. Part 2. Leif Holm. July 15, p. 32.

Coal dust suppression system creates 'fog' to alleviate wet coal problems. Jacqueline Cox. January 30, p. 53.

Computer and high-speed photography applications in the wet end section. L. Diane Murdock. April 15, p. 32.

Computer-optimized kiln control system saves energy, improves product quality. R. B. Bailey, F. R. Martin, and T. R. Willison. February 28, p. 33.

Effective conveyance of wood chips, chemicals, and additives from storage. Richard C. Wahl. February 28, p. 35.

G-P completes first phase of upgrade at 1,300-tpd Crossett pulp & paper mill. Jeremiah E. Flynn. August 15, p. 17.

High-energy plasma coating increases output of resurfaced Yankee cylinders. Edmund Hayes Jr. September 30, p. 46.

Impact System 4000 adds a new dimension to paper-machine moisture profile control. Kenneth P. Ostrow. October 30, p. 56.

Kuesters' Vario Swimming Roll offers effective control over nip pressures. Jacqueline Cox. January 30, p. 56.

Membrane filtration system recovers mill by-products & organic chemicals. Jacqueline Cox. February 15, p. 27.

Microprocessor-based balance monitors product weight; cuts time/labor costs. Jacqueline Cox. March 15, p. 56.

New weight profiling system reduces basis weight variation by up to 75%. Fred White. March 15, p. 47.

PCA's computer provides link to data for its 30-plant network & sales force. Fred White. February 15, p. 33.

Programmable controller system features fault tolerance/relay logic. Fred White. October 15, p. 28.

Selecting/evaluating steam turbine generators for pulp and paper mills. Part 1. Leif Holm. July 15, p. 28.

Solid silicone coating system provides even, automatic flow. Jacqueline Cox. February 28, p. 32.
